INSTRUCTIONS:

Select and place one Infrastructure card in the center of the circle.

Discuss and write down:

(A) all the social, political, power, cultural, and environmental circumstances of this infrastructure's construction and use as well as its unintended consequences.

(B) What does this infrastructure afford, how has it changed the world around us? How has it changed us, our relationships to one another, our patterns of behaviour?

hint: use the provided prompts on the Play Mat to assist your discussion.

What do these mean?

Use the space below to unpack what each of the above values mean.

NEW INFRASTRUCTURE:

Use this space to design a new digital infrastructure based on your new value set.

Propose a design where technology does not only serve the value of making things faster, more efficient, but instead focuses significantly on human experience and life itself, utilizing your 2 New World values as its main drivers.

Use this space to map, sketch, and write down a brief description of how your new system works.
